

Objective 3: Conservation and Management

“To promote and facilitate the appropriate and effective conservation and management of local geodiversity.”

Objective 3: Conservation and Management

Managing and conserving geodiversity

 Work ongoing  Work planned  Future action

Action	Action status
<ul style="list-style-type: none">To develop site management plans for all local geological sites	
<ul style="list-style-type: none">To establish working partnerships with local landowners to facilitate the conservation and management of local sites.	
<ul style="list-style-type: none">To organise regular site clearance visits to maintain the quality of key geological exposures.	
<ul style="list-style-type: none">To develop links with local quarry operators to ensure that restoration plans preserve important geological exposures	
<ul style="list-style-type: none">To work towards the integrated conservation of local sites that considers both their geodiversity and biodiversity value through the development of effective working partnerships with other nature conservation organisations.
