

Objective 4: Education and Site Use

“To foster a wider appreciation of the importance of local geodiversity and encourage the appropriate use of the county’s geological sites in order to realise their social, educational, economic and environmental benefits.”

Objective 4: Education and Site use

Delivering sustainable social, economic and environmental benefits and promoting geodiversity

Work ongoing

Work planned

Future action

Action	Action status
<ul style="list-style-type: none">To continue to develop a website that provides key information on the county's geodiversity and to develop innovative electronic materials (e.g. virtual interpretation boards).	
<ul style="list-style-type: none">To establish a series of geotrails that showcase areas of particular geological and geomorphological value	
<ul style="list-style-type: none">To organise guided walks that provide a first hand insight into geology and landscape.	
<ul style="list-style-type: none">To promote and help maintain geological displays at key local museums and visitor centres.	
<ul style="list-style-type: none">To develop a diverse suite of educational materials for the sites of most educational value that establishes the importance of geodiversity in the context of the national curriculum.	
<ul style="list-style-type: none">To support key events including rock and fossil fairs.	
<ul style="list-style-type: none">To promote the county's diverse geodiversity through contributions to relevant publications.	
<ul style="list-style-type: none">To promote the use of local geodiversity sites for active recreation.
